ABOUT CNAM

WHAT IS CNAM?

CNAM is the association of public infrastructure asset management in Canada. Our government and private sector members develop policy, tools and technologies which improve the level of service for public infrastructure assets in every province and territory. CNAM shares that knowledge with other members and stakeholders through our annual conference, webinars, various committees and resources such as CNAMpedia.

CNAM is a not-for-profit organization initially established for municipalities by municipalities. The focus has since shifted to include all public infrastructure asset management.
